**Subject:** Settlement

I have read the text of the settlement agreement regarding Microsoft. If this settlement is approved it doesn't appear that Microsoft will be penalized for its behavior. I imagine Mr. Gates must be giddy about the terms of this settlement as it clearly extends his company's tentacles in areas that couldn't afford his products before this.

Please negotiate a settlement that has no Microsoft logo on any element of it. Recipients should be able to make decisions on the use their share of the settlement from all platforms/products available from all vendors?
